DINOBOT: 24/7 AUTONOMOUS RESTAURANT CONCIERGE & QUEUE AGENT

DINOBOT CAPABILITY	OPERATIONAL WORKFLOW & BUSINESS IMPACT
1. Smart Queue & Table Booking Peak Virtual Queue & Non-Peak Res. `WhatsApp · Telugu & English`	Handles reservations 24/7. During peak rush (6:30 PM – 10:30 PM), issues numbered **VIP Priority Queue passes** rather than holding empty tables. Diners receive automated WhatsApp arrival alerts when their cabana is clearing up, preventing floor friction with waiting walk-ins. ✓ **Recovers 8–12 walkaway dining parties during peak queues (~₹35,000–₹45,000/mo)**
2. Conversational Menu Concierge Platter Sizing & Tanglish Fluency `Bilingual NLP (Telugu + English)`	Understands natural Tanglish (e.g., *"Mutton juicy available unda bro?"*). Automatically suggests portion sizes by headcount (Single, Duo, Quad, or 6-Pax Monster Platter), confirms 100% Halal certification, and dispatches the high-resolution menu card PDF on demand. ✓ **Eliminates front-desk phone strain · Drives high-margin platter upsells**
3. Location & Arrival Guide Instant Navigation & Landmark Pins `1-Tap Google Maps Integration`	Sends an exact GPS pin with clear landmark directions (*"Kundula Road, Beside Ayyappa Swamy Temple, Above Ratnadeep Super Market"*), informs guests of dedicated 2-wheeler and car parking availability, and answers live operating hours and last-order cutoff times. ✓ **Eliminates 40–50 repetitive direction calls daily**
4. Party & Themed Event Booking Cave Cabana Celebration Engine `Instant Manager WhatsApp Alert`	Captures high-value inquiries for birthdays, family feasts, and groups of 8+. Automatically logs celebration requests (dino cave theme, cake-cutting setups, monster platters) and routes the customer lead straight to the Owner/Manager's phone for VIP coordination. ✓ **Captures ₹15,000–₹30,000 in high-ticket group party bookings weekly**
5. Drive-By Takeaway Pre-Ordering Advance Pickup & UPI QR Pay `WhatsApp Counter Relay`	Customers on the road message their order in advance (e.g., *"Pack 1 Mutton Gongura Mandi, picking up in 20 mins"*). DinoBot logs the order, alerts the parcel packing counter, and provides the restaurant's UPI QR for instant advance payment before arrival. ✓ **Zero phone hold times · Speeds up peak takeaway parcel turnover**
6. Smart 5-Star Review Shield Private Feedback & Google Maps SEO `2-Hr Post-Meal Sentiment Routing`	Pings diners 2 hours post-meal. Happy diners (4–5 stars) are directed straight to Google Maps with pre-populated praise tags. Unhappy diners (1–3 stars) are intercepted privately, alerting management on WhatsApp to resolve complaints before a negative review goes public. ✓ **Attracts 15–20 high-value group walk-ins via #1 Google Maps rank (~₹35,000–₹50,000/mo)**

Operational Guarantee: Zero Floor Disruption & Zero POS Friction

DinoBot operates 100% in the cloud via WhatsApp Cloud API. Waiters and kitchen staff need no new hardware, tablets, or workflow adjustments. Petpooja POS cashier billing remains completely untouched.
